

32A EV Charger Wallbox 3Phase 22.08KW Electric Car Charging Station Type2 Cable 5m With LCD Screen

Basic Information

Place of Origin: China
Brand Name: MINKO
Certification: CE, ROHS
Model Number: Wallbox-I22
Minimum Order Quantity: 5 pieces
Price: negotiation

Packaging Details: L210xW85xH52 (mm)
 Delivery Time: 8 -10 working days
 Payment Terms: T/T, Western Union,

MoneyGram,Paypal,Skrill,Transferwise

• Supply Ability: 1000000 pieces per month

Product Specification

Charging Plug: Type 2Withstand Voltage: 3000v

• Input / Output Current: 8,12,16,20,24,28,32A Adjustable

Max Output Power: 22.08 KWCable Length: 5M

• Input Cable: 1M, Hard-wired

Stand By: <3WIP Level: IP65

• Highlight: type 2 wallbox 22kw charger,

3 phase wallbox electric car charger, 32a wallbox electric car charger

Product Description

32A EV Charger Wallbox 3Phase 22.08KW Electric Car Charging Station Type2 Cable 5m with LCD Screen

Description of Type2 Wallbox EV Charger

This product is mainly composed of charging station host, charging gun, wire, installation backplane, installation ingredients package, etc. It is a household electric vehicle charging equipment. The AC charging station is connected to the mains, the electric vehicle will be safely and reliably charged by the charging gun interface; to avoid affffecting the product performance, should no acid and alkali and other corrosive gases in the surrounding; try to avoid direct rain or use in environments with high humidity, and should try to prevent damage from impacting the housing.

Product parameter description:

- reduct parameter det			
Model	17	111	l22
Input / Output Voltage	AC 230V / Single	AC 400V / Three	AC 400V / Three
	Phase	Phase	Phase
Input / Output Current	8,12,16,20,24,28,32	8,10,12,14,16A	8,12,16,20,24,28,32A
	adjustable	adjustable	adjustable
Max Output Power	7.36 KW	11.04 KW	22.08 KW
Frequency	50/60Hz		
Input Cable	1M, hard-wired		
Charging Plug	Type 2(Mennekes)		
Length	European standard, Default 5M		
Withstand Voltage	3000V		
Work Altitude	<2000M		
Stand by	<3W		
Operating temperature	-35°C to 50°C		
Start method	Card, WIFI, Bluetooth APP a variety of options to start charging		
Protection	over voltage protection, over load protection, over-temp		
	protection, under voltage protection, earth leakage protection,		
	lightning protection, short circuit protection		
IP level	IP65		
Touch Button	Yes		
LCD Screen	Yes		
Current Adjustment	Yes		
Bluetooth APP	Yes / No		
charging			
WiFi APP charging	Yes / No		
RFID	Yes		
Timing / Appointment	Yes / No		
Certification	CE, RoHS		
Warranty	1 Year for the whole machine		

Feature of Wallbox Charger Station with LCD Screen

- 1. The product complies with the Low Voltage Directive 2014/35/EU, IEC61851-1:2019
- 2.IP65, weatherproof; leakage protection; impact resistance
- 3. Charging status and working error are simply displayed by LED indicator light and LCD screen
- 4. Optional unction of current selection button,
- 5. 8A-48A free switching current

Card, WIFI, Bluetooth a variety of options to start charging

Function introduction of Type2 Wallbox EV Charger

1.Residual current detection (RCD)

Ac leakage protection automatically detects the AC mismatch between the power supply wires, which indicates that the current flflows through the grounded (PE) wire. Ac residual current fault protection will trip when the current is 30 Ma.

2.Surge protector

In: 3kA, Imax:6kA

3.Leakage protection

When the leakage protection is started, it needs to be cut offff the power outage and restart.

4. Overcurrent protection

When the current exceeds the early warning value, the charging pile cuts offff the power output, restarts automatically after 10 seconds, and does not recover automatically after 3 cycles until you cut of the power and restart.

5. Overvoltage protection

The protection starts when the voltage exceeds 275V, and automatically recovers when the voltage is restored and stabilized.

6.Undervoltage protection

Start the protection when the voltage is less than 100V, and restore automatically when the voltage is restored and stabilized.

7. Overtemperature protection

Start the protection when the internal temperature of the EV charging station exceeds 85 °C.

Installation Procedure:

1. Please use a percussion drill to drill holes according to the cardboard positioning

- 2. Install expansion bolts(6*M6*60MM)
- 3. fix the Mounting backplane with self=tapping screws(6*M5*50mm)
- 4. Align the main unit with the buckle on the back panel and install it, and then use screw to fix(4*M5*40)

Instructions

- When the machine is on standby normally, the indicator light is fixed blue.
 Remove the charging gun from the holder, insert the charging gun into the car charging socket.
- 3. After the gun insertion completed, the vehicle automatically starts to charge normally, and the blue meteor light on.
- 4. The indicator light always turns blue after the charge is completed.

FUNCTION & PROTECTION

Over Temperature Protection

Type B Leakage Protection

Waterproof & Dustproof IP65

Ground Protection

Over Voltage Protection

Over Current Protection

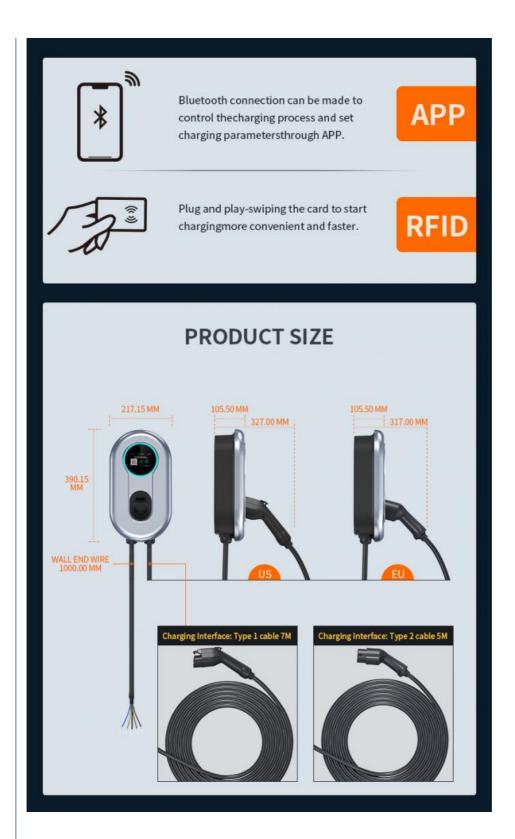

Short Circuit Protection

Lightning Protection
